# INTRODUCTION

Library of American Landscape History, the only not-for-profit organization devoted to publishing books on the history of the North American landscape, was founded in 1992 to advance scholarship in the field of landscape studies. Since then, LALH has developed dozens of books as well as touring exhibitions, films, and other online resources featuring North America's rich and varied landscape. In 2011, LALH completed the ASLA Centennial Reprint series, a collection of ten classic volumes selected for their impact on the history of landscape design.

Two years ago, LALH launched its Masters of Modern Landscape Design series with *Ruth Shellhorn*, the first of many volumes that will explore significant figures in American landscape design, providing missing chapters in our history and establishing a new understanding of the historical context and basis of landscape design practice today. Also in partnership with the University of Georgia Press, LALH is build-

ing two more groundbreaking book series—Critical Studies in the History of Environmental Design and Designing the American Park—which extend our understanding of landscape architecture by focusing on public spaces and social issues. Other monographs published by LALH address a range of topics related to landscapes and their design, all of which are chosen for their relevance in the field today and their contribution to the historical record.

As the LALH catalog demonstrates, the lessons of early practitioners continue to provide insight into the development of design solutions for the twenty-first century as well as the preservation of historic landscapes. The books featured in LALH's catalog reflect its mission—to advance the study and practice of American landscape architecture, motivate stewardship of significant places and the environment, and inspire new designs that connect people with nature.

**Ellen Shipman  
and the American Garden**  
Judith B. Tankard

*A revised edition of the LALH classic*

University of Georgia Press in association with LALH  
Cloth \$39.95  
ISBN: 978-0-8203-5208-4  
To order: University of Georgia Press

*The Gardens of Ellen Biddle Shipman*, published in 1996, introduced a generation of garden lovers to Ellen Shipman (1869–1950), a Philadelphian who discovered her remarkable talent for landscape design in the artists' colony in Cornish, New Hampshire. Beginning her career as a hands-on gardener, Shipman received drafting instruction from Charles A. Platt. In time, she was collaborating with Platt, Warren H. Manning, and other landscape architects, who incorporated her sumptuous flower borders into their estate layouts.

The scope of Shipman's practice and gardenmaking grew as she set up her professional office in New Hampshire. In the early 1920s she moved to New York City, where she attracted clients throughout the United States, eventually recording more than 650 commissions. Judith B. Tankard's award-winning book was the first to present Shipman's achievements and in doing so illuminated a neglected topic: women and American landscape architecture.

In response to the popularity of Tankard's book and its increasing scarcity, LALH published an updated edition that covers several gardens designed by Shipman that were discovered as a result of the original edition—among them, the Italian Garden at the Cummer Museum of Art & Gardens (Jacksonville, Fla.) and Tranquillity Farm (Middlebury, Conn.). The revised edition also features a new full-color introduction and an expansive new design.

PRAISE FOR THE FIRST EDITION:

"It is a handsome book, valuable not only to historians and garden designers, but also to every garden maker. The details and explanations offered by Tankard reveal much of the garden designer's art."

—George Waters, *Pacific Horticulture*

"Fascinating, historic, poignant."

—Maxine Kumin, *The New York Times*

## The Best Planned City in the World: Olmsted, Vaux, and the Buffalo Park System

Francis R. Kowsky

*Paperback edition*

*A volume in the series*

*Designing the American Park*

LALH/University of Massachusetts Press

Paper \$29.95

ISBN: 978-1-62534-291-1

To order: University of Massachusetts Press

*Winner, J. B. Jackson Book Prize from the  
Foundation for Landscape Studies*

*This award-winning book is the definitive account of the creation and development of the country's first urban park system.*

Beginning in 1868, Frederick Law Olmsted and Calvert Vaux created a series of parks and parkways for Buffalo, New York, that drew national and international attention. The improvements augmented the city's original plan with urban design features inspired by Second Empire Paris, including the first system of "parkways" to grace an American city. Displaying the plan at the Philadelphia Centennial Exposition, Olmsted declared Buffalo "the best planned city, as to streets, public places, and grounds, in the United States, if not in the world."

In this book Francis R. Kowsky illuminates this remarkable constellation of projects. Utilizing original plans, drawings, photographs, and copious numbers of reports and letters, he brings new perspective to this vast undertaking, analyzing it as an expression of the visionary landscape and planning principles that Olmsted and Vaux pioneered.

"In 1868, an invitation was made to Frederick Law Olmsted and Calvert Vaux, the men who had designed Central Park, to come upstate

and pass their judgements on the opportunity for Buffalo to demonstrate its civic arrival with a grand new park. This is the story that Francis Kowsky tells, and he does so virtually to perfection."

—*Landscape Journal*

"Kowsky reminds us that parks are not open spaces awaiting development, and that people need trees, meadows, expanses of water, and walking paths, and biking trails. . . . [His] masterful book makes the visionary landscape and planning principles Olmsted and Vaux pioneered in Buffalo clear, with the hope that restoration efforts will once again allow it to become the best planned city in the world."

—*Nineteenth-Century Art Worldwide*

"In his magnificent new book, with its lucid prose and deft organization, Kowsky follows the evolution of Olmsted and Vaux's astonishing creations in Buffalo—those 'landscapes of recreation, residence, memory, and healing,' as he so gracefully describes them. . . . An extraordinary variety and abundance of illustrations fill the book, including photographs new and old, maps, diagrams, paintings, and lithographs."

## Hare & Hare, Landscape Architects and City Planners

Carol Grove and Cydney Millstein

*A volume in the series  
Critical Perspectives in the History  
of Environmental Design*

University of Georgia Press in association with LALH

Cloth \$39.95

ISBN: 978-0-8203-5481-1

To order: [University of Georgia Press](#)

When Sidney J. Hare (1860–1938) and S. Herbert Hare (1888–1960) launched their Kansas City firm in 1910, they founded what would become the most influential landscape architecture and planning practice in the Midwest. Over time, their work became increasingly far-ranging, both in its geographical scope and project types. Between 1924 and 1955, Hare & Hare commissions included fifty-four cemeteries in fifteen states; numerous city and state parks (seventeen in Missouri alone); more than fifteen subdivisions in Salt Lake City; the Denver neighborhood of Belcaro Park; the picturesque grounds of the Christian Science Sanatorium in Chestnut Hill, Massachusetts; and the University of Texas at Austin among fifty-one college and university campuses.

In their forthcoming book, Carol Grove and Cydney Millstein document the extraordinary achievements of this little-known firm and weave them into a narrative that spans the birth of the late nineteenth-century “modern cemetery movement” to midcentury modernism. Through the figures of Sidney, a “homespun” amateur geologist who built a rustic family retreat called Harecliff, and his son Herbert, an

urbane Harvard-trained landscape architect who traveled Europe and lived in a modern apartment building, Grove and Millstein chronicle the growth of the field from its amorphous Victorian beginnings to its coalescence as a profession during the first half of the twentieth century. *Hare & Hare, Landscape Architects and City Planners* provides a unique and valuable parallel to studies of prominent East and West Coast landscape architecture firms—one that expands the reader’s understanding of the history of American landscape architecture practice.

“Carol Grove and Cydney Millstein have mined an impressive array of period sources, published and archival, to provide a detailed, meticulously researched account of their subject. This book should be welcomed by all historians of landscape architecture in the United States and also by many historians of planning and urbanism more broadly, as well as practitioners who understand how history can inform the future.”

—Richard Longstreth, George Washington University

# FORTHCOMING

## **The Greatest Beach: A History of Cape Cod National Seashore** Ethan Carr

*A volume in the series  
Designing the American Park*

University of Georgia Press in association with LALH

In the mid-nineteenth century, Thoreau recognized the importance of preserving the complex and fragile landscape of Cape Cod, with its weathered windmills, expansive beaches, dunes, wetlands, and harbors, and the lives that flourished here, supported by the maritime industries and saltworks. One hundred years later, the National Park Service—working with a group of concerned locals, then-senator John F. Kennedy, and other supporters—took on the challenge of meeting the needs of a burgeoning public in this region of unique natural beauty and cultural heritage.

To those who were settled in the remote wilds of the Cape, the impending development was threatening, and, as the award-winning historian Ethan Carr explains, the visionary plan to create a national seashore came very close to failure. Success was achieved through unprecedented public outreach, as the National Park Service and like-minded Cape Codders worked to convince entire communities of the long-term value of a park that could accommodate millions of tourists. Years of contentious negotiations resulted in the innovative compromise between private and public interests now known as the “Cape Cod model.”

*The Greatest Beach* will be essential reading for all who are concerned with protecting the nation’s gradually diminishing cultural landscapes. In his final analysis of Cape Cod National Seashore, Carr poses provocative questions about how to balance the conservation of natural and cultural resources in regions threatened by increasing visitation and development.

“Carr explores the shift toward a more holistic landscape approach to cultural resource management and the broader applicability of the “Cape Cod Model”—providing additional insight into contemporary landscape challenges facing the national park system today. This broad narrative is skillfully interwoven with the arresting story of the establishment of Cape Cod National Seashore, a park that has served as a model for testing a wide variety of new approaches to park making and administration. Carr has written an exceptionally readable book that is informative, analytical, and engaging.”

—Rolf Diamant, University of Vermont

# FORTHCOMING

**Robert Royston**

Reuben Rainey and JC Miller

*A volume in the series*

*Masters of Modern Landscape Design*

University of Georgia Press in association with LALH

The first biography of the landscape architect Robert Royston (1918–2008) documents the life and work of a designer and teacher who shaped the postwar Bay Area landscape with visionary designs for public spaces. Early in his career, Royston conceived of the “landscape matrix,” a system of interconnected parks, plazas, and parkways that he hoped could bring order and amenity to the rapidly developing suburbs. The ideals represented by the landscape matrix would inform his work on more than two thousand projects—landscapes as diverse as school grounds, new towns, transit corridors, and housing tracts.

As an apprentice of Thomas Church, Royston learned from a master in residential garden design, but he soon moved on to establish a partnership with Garrett Eckbo and Edward Williams and to launch an academic career at Berkeley. His experience with private gardens influenced his early public park designs, which

he considered spaces for the American family—a novel concept at a time when such neighborhood parks were typically limited to playing fields and stock playground equipment. This new type of park offered not only distinct areas and activities for all ages but also easy access to the community centers, libraries, and other facilities within the landscape matrix.

Royston, Hanamoto & Mayes, the firm Royston founded in 1958, grew to become one of the nation’s most influential corporate firms. Over nearly six decades of practice, Royston helped to make the Bay Area a cohesive, desirable location to live and work. He designed landscapes to benefit diverse sectors of the community, setting a high standard of inclusivity and environmental awareness. In addition to the many beloved places Royston created, his perceptive humanism, passed down to his students and colleagues, is his enduring legacy.

# FORTHCOMING

**A. E. Bye**

Thaisa Way

*A volume in the series*

*Masters of Modern Landscape Design*

University of Georgia Press in association with LALH

Throughout his more than fifty-year career as a landscape architect, A. E. Bye (1919–2001) approached his work with the sensibility of an artist, the eye of a photographer, and the precision of a scientist. He designed landscapes to intensify their inherent qualities and “moods,” using abstract forms and defining relationships among elements to explore a site’s underlying natural processes. As he strove to reveal the essence of a landscape, Bye created memorable places that have become modernist works of art.

After launching his practice in 1951, Bye began developing a design aesthetic rooted in his deep affinity for the natural world and his belief in the art of landscape architecture, its power to evoke emotional responses to place. Grounding his designs in an ecological understanding of a site and a desire to use existing materials, he evolved an approach based in constructing landforms. He is perhaps best known for the landscape he created for George and Annalise

Soros on Long Island, with its undulating earth mounds that become abstractions as the sun and shadows pass over them or snow melts in ever-shifting forms.

Beginning in the 1950s, he broke new ground in his field designing campus plans for the new building type of suburban corporate headquarters. In his work for Avon, Chrysler, Westinghouse, Dow Corning, and other companies, he answered the challenge of integrating large-scale industrial architecture into a residential context by sculpting landforms and planting buffers, softening the visual impact and in some cases creating public greenspace. His solution became the standard for the suburban corporate landscape. In his original explorations of landform as an art, his celebration of the garden as a place for reflection, and his effort to achieve an ecological balance in his work, A. E. Bye offered a unique and timeless vision of how modernist landscape architecture could improve the quality of life.

**Lawrence Halprin**  
**Kenneth I. Helphand**

*A volume in the series*  
*Masters of Modern Landscape Design*

University of Georgia Press in association with LALH  
Paperback \$26.95  
ISBN: 978-0-8203-5207-7  
To order: [University of Georgia Press](#)

*Winner, J. B. Jackson Book Prize from the  
Foundation for Landscape Studies*

During a career spanning six decades, Lawrence Halprin (1916–2009) became one of the most prolific and outspoken landscape architects of his generation. He took on challenging new project types, developing a multidisciplinary practice that experimented with adaptive reuse and ecological design in relation to shopping malls, the freeway, and urban renewal. In his lifelong effort to improve the American landscape, Halprin celebrated the creative process as a form of social activism.

A native New Yorker, Halprin earned degrees from Cornell and the University of Wisconsin before completing his design degree at Harvard. In 1945, he joined Thomas Church’s firm, where he collaborated on the iconic Donnell Garden. Halprin opened his own San Francisco office in 1949. Halprin’s firm initially focused on residential commissions in the Bay Area, completing close to three hundred in its inaugural decade. By the 1960s, the firm had gained recognition for significant urban renewal projects such as Ghirardelli Square in San Francisco (1962–68), Nicollet Mall in Minneapolis (1962–67), and Freeway Park in Seattle (1970–74). In 1965,

Halprin used his conception of a Sierra stream as the catalyst for the Portland (Oregon) Open Space Sequence, a series of parks featuring great fountains that linked housing and civic space in the inner city.

A charismatic speaker and passionate artist, Halprin designed landscapes that reflected the democratic and participatory ethic characteristic of his era. He communicated his ideas as well in lectures, books, exhibits, and performances, and he consulted on important urban commissions throughout the country. Along with his contemporary Ian McHarg, Halprin was his generation’s great proselytizer for landscape architecture as environmental design. Throughout his long career, he strove to develop poetic and symbolic landscapes that, in his words, could “articulate a culture’s most spiritual values.”

*“Lawrence Halprin will be enormously useful to teachers and students of landscape architecture around the world, as well as attractive to professional landscape architects, architects, urban designers, and the educated public.”*

—Laurie Olin, FASLA

**Warren H. Manning,  
Landscape Architect and  
Environmental Planner**

Edited by Robin Karson, Jane Roy  
Brown, and Sarah Allaback

Featuring new photographs by Carol Betsch

*A volume in the series Critical Perspectives in  
the History of Environmental Design*

University of Georgia Press in association with LALH

Cloth \$39.95

ISBN: 978-0-8203-5066-0

To order: University of Georgia Press

*Winner, J. B. Jackson Book Prize from the  
Foundation for Landscape Studies*

*A Choice Outstanding Academic Title*

Warren H. Manning's (1860–1938) national practice comprised more than 1,600 landscape design and planning projects throughout North America, from small home grounds to estates, cemeteries, college campuses, parks and park systems, and new industrial towns. Manning approached his design and planning projects from an environmental perspective, conceptualizing projects as components of larger regional (in some cases, national) systems, a method that contrasted sharply with those of his stylistically oriented colleagues. In this regard, as in many others, Manning had been influenced by his years with the Olmsted firm, where the foundations of his resource-based approach to design were forged. Manning's overlay map methods, later adopted by the renowned landscape architect Ian McHarg, provided the basis for computer mapping software in widespread use today.

One of the eleven founders of the American Society of Landscape Architects, Manning also ran one of the nation's largest offices, where he

trained several influential designers, including Fletcher Steele, A. D. Taylor, Charles Gillette, and Dan Kiley. After Manning's death, his reputation slipped into obscurity. Contributors to the Warren H. Manning Research Project worked for more than a decade to assess current conditions of his built projects and to compile a richly illustrated compendium of site essays that illuminate the range, scope, and significance of Manning's notable career.

"Manning has always been something of a cipher in landscape architectural history, and this book does a good job in clearing away some of the murkiness that has existed around him and his career. The overview essay, in particular, provides new insights into Manning's life, personality, and motivations; it also sheds light on the nature of 'office practice' in the profession's early years, as Manning moves from junior designer at the Olmsted firm to sole practitioner."

—Heidi Hohmann, Iowa State University

**James Rose**  
Dean Cardasis

*A volume in the series*  
***Masters of Modern Landscape Design***

University of Georgia Press in association with LALH  
Paperback \$26.95  
ISBN: 978-0-8203-5095-0  
To order: [University of Georgia Press](#)

***Winner, J. B. Jackson Book Prize from the  
Foundation for Landscape Studies***

*James Rose*, the first biography of this important landscape architect, explores the work of one of the most radical figures in the history of mid-century modernist American landscape design. An artist who explored his profession with words and built works, Rose fearlessly critiqued the developing patterns of land use he witnessed during a period of rapid suburban development. The alternatives he offered in his designs for hundreds of gardens were based on innovative and iconoclastic environmental and philosophic principles, some of which have become mainstream today.

A classmate of Garrett Eckbo and Dan Kiley at Harvard, Rose was expelled in 1937 for refusing to design landscapes in the Beaux-Arts method. In 1940, the year before he received his first commission, Rose also published the last of his influential articles for *Architectural Record*, a series of essays written with Eckbo and Kiley that would become a manifesto for developing a modernist landscape architecture. Over the next four decades, Rose articulated his philosophy in four major books: *Creative Gardens* (1958), *Gardens Make Me Laugh* (1965), *Modern American Gardens* (1967), and *The Heavenly Environment* (1987). His writings foreshadowed many principles since embraced by the profes-

sion, including the concept of sustainability and the wisdom of accommodating growth and change.

*James Rose* includes new scholarship on many important works, including the Dickenson Garden in Pasadena and the Averett House in Columbus, Georgia, as well as unpublished correspondence. In letters to his mother, Rose reveals a tenderness toward nature and faith in spiritual harmony that belies his reputation as an alienated social critic. Throughout his career Rose refined his conservation ethic, seeing recycled materials and waste reduction as opportunities to create landscapes for contemplation, self-discovery, and pleasure. At a time when issues of economy and environmentalism are even more pressing, Rose's writings and projects are both relevant and revelatory.

"This is the book that the history of a half century of American landscape architecture is missing. We all owe a great debt to Professor Cardasis for his decades-long work to protect and extend the legacy of James Rose."

—Patrick M. Condon, Chair, Urban Design  
Program, University of British Columbia  
School of Architecture and Landscape  
Architecture

## Ruth Shellhorn

Kelly Comras

*A volume in the series*

*Masters of Modern Landscape Design*

University of Georgia Press in association with LALH

A Bruce and Georgia McEver Fund for the Arts and

Environment Publication

Paperback \$26.95

ISBN: 978-0-8203-4963-3

To order: [University of Georgia Press](#)

**Winner, American Society of Landscape  
Architects Southern California Chapter  
Honor Award**

In a career spanning nearly sixty years, Ruth Shellhorn (1909–2006) helped shape Southern California's iconic modernist aesthetic. This is the first full-length treatment of Shellhorn, who created close to four hundred landscape designs, collaborated with some of the region's most celebrated architects, and left her mark on places ranging from college campuses to Disneyland's Main Street.

Kelly Comras tells the story of Shellhorn's life and career before focusing on twelve projects to explore her approach to design and aesthetic philosophy in greater detail. The book's case studies include designs for Bullock's department stores and Fashion Square shopping centers; school campuses, including a multiyear master plan for the University of California at Riverside; a major Los Angeles County coastal planning project; the western headquarters for Prudential Insurance; residential estates and gardens; and her collaboration on the original plan for Disneyland.

Shellhorn received formal training at Oregon State and Cornell University and was influenced by such contemporaries as Florence Yoch, Beatrix Farrand, Welton Becket, and Ralph Dalton Cornell. As president of the Southern California chapter of ASLA, she became a champion

of her profession, working tirelessly to achieve state licensure for landscape architects. In her own practice, she collaborated closely with architects to address landscape concerns at the earliest stages of building design, retained long-term control over the maintenance of completed projects, and considered the importance of the region's natural environment at a time of intense development throughout Southern California.

"Kelly Comras's book on Ruth Shellhorn will, at long last, put her in proper perspective as an important pioneer in landscape design and planning in California. The book is totally engaging, with clear, direct writing, based on impeccable research and documentation."

—Darrel Morrison, FASLA, Professor  
Emeritus, University of Georgia

"Comras provides the context (cultural and physical) that allows the reader to comprehend the legendary Shellhorn as a person and as a designer and to recognize the value of her contribution to the California landscape—and thus to America's national landscape design heritage."

—Noel Dorsey Vernon, ASLA, Professor  
Emerita, Cal Poly Pomona

## **Landscapes of Exclusion: State Parks and Jim Crow in the American South**

**William E. O'Brien**

*A volume in the series  
Designing the American Park*

University of Massachusetts Press in association with  
LALH

Cloth \$39.95

ISBN: 978-1-62534-155-6

To order: [University of Massachusetts Press](#)

*Winner, J. B. Jackson Book Prize from the  
Foundation for Landscape Studies*

*Winner, American Association for State and  
Local History Award of Merit*

During the 1930s, the state park movement and the National Park Service expanded public access to scenic American places, especially during the era of the New Deal. However, under severe Jim Crow restrictions in the South, African Americans were routinely and officially denied entrance to these supposedly shared sites. In response, advocacy groups pressured the National Park Service to provide some facilities for African Americans. William E. O'Brien shows that these parks were typically substandard in relation to "whites only" areas.

As the NAACP filed federal lawsuits that demanded park integration and increased pressure on park officials, southern park agencies reacted with attempts to expand segregated facilities, hoping they could demonstrate that these parks achieved the "separate but equal" standard. But the courts consistently ruled in favor of integration, leading to the end of segregated state parks by the middle of the 1960s. Even though the stories behind these largely inferior facilities faded from public awareness,

the imprint of segregated state park design remains visible throughout the South.

O'Brien illuminates this untold facet of Jim Crow history in the first-ever study of segregation in southern state parks. His book underscores the profound disparity that persisted for decades in the number, size, and quality of state parks provided for black visitors in the Jim Crow South.

"State park design in the South during the Jim Crow era is a highly significant chapter in the cultural history of American parks, and one that has received almost no scholarly attention. Many state parks or park areas created under the 'separate but equal' doctrine were subsequently altered so that their origins are not immediately apparent today. O'Brien's remarkable work of scholarship makes it possible for us, finally, to understand this formerly obscured category of American parks."

—Ethan Carr, author of *Mission 66: Modernism  
and the National Park Dilemma*

**Apostle of Taste:**  
**Andrew Jackson Downing,**  
**1815–1852**  
David Schuyler

**NEW EDITION**

LALH/University of Massachusetts Press  
Paperback \$24.95  
ISBN: 978-1-62534-168-6  
To order: University of Massachusetts Press

Through his many books and in the pages of the *Horticulturist*, the nation's first journal about landscape gardening, Andrew Jackson Downing (1815–1852) preached a gospel of taste, promoting a naturalistic style of landscape design as the “modern” alternative to the classical geometry of the “ancient” gardens of Italy and France. Together with his longtime collaborator, Alexander Jackson Davis, Downing also contributed to an architectural revolution that sought to replace the Classical Revival with the Gothic Revival and other romantic styles. Downing celebrated this progression not simply as a change in stylistic preference but as a reflection of the nation's evolution to a more advanced state of civilization.

In this compelling biography, issued in a new edition with a new preface, David Schuyler explores the origins of the tastemaker's ideas in English aesthetic theory and his efforts to adapt English principles to American climate and republican social institutions. Tracing the impulse toward a native architectural style,

Schuyler also demonstrates the influence of Downing's ideas on the period's gardens and, more broadly still, analyzes the complications of class implicit in Downing's prescriptions for American society. The new edition is illustrated with more than a hundred drawings, plans, and photographs.

**PRAISE FOR THE FIRST EDITION:**

“The vast amount of visual evidence combines with the material and personal history of Downing to make *Apostle of Taste* a must for scholars of architectural and landscape history.”

—*Pennsylvania History*

“Schuyler's excellent study of Downing's writing and career, complete with excellent illustrations and an extensive, annotated bibliography, will serve as one major starting point for future studies of Downing.”

—*Winterthur Portfolio: A Journal of American Material Culture*

**John Nolen:**  
**Landscape Architect**  
**and City Planner**  
R. Bruce Stephenson

University of Massachusetts Press in association with  
LALH

***Winner, J. B. Jackson Book Prize from the  
Foundation for Landscape Studies***

John Nolen (1869–1937) studied economics, philosophy, and public administration at the Wharton School of the University of Pennsylvania, where his keen intelligence and remarkable administrative abilities were immediately recognized. In 1903, at the age of thirty-four, Nolen enrolled in the new Harvard University program in landscape architecture, studying under Frederick Law Olmsted Jr. and Arthur Shurcliff. Two years later, Nolen opened his office in Harvard Square.

Over the course of his career, Nolen and his firm completed more than 400 projects, including comprehensive plans for twenty-nine cities and twenty-seven new towns, all of them in the United States. Like other reformers of the Progressive Era, Nolen looked to Europe for models to structure the rapid urbanization defining modern life into more efficient and livable form. Nolen's mutually influential relationship with Raymond Unwin, England's preeminent garden city planner, typified the "Atlantic Crossings" that produced a host of intensely interesting

planning experiments in England, Europe, and the United States during the first decades of the twentieth century.

In this insightful biography, Bruce Stephenson analyzes the details of Nolen's experiments, illuminating the planning principles he used in laying out communities from Mariemont, Ohio, to Venice, Florida. Stephenson's conclusion discusses the potential of Nolen's work as a model of a sustainable vision relevant to American civic culture today.

"The long overdue and definitive biography of one of America's most prominent and influential urbanists. . . . Stephenson effectively positions Nolen between the classical practitioners of the nineteenth century and the modern ecological focus of the twentieth century (which he helped to establish)."

—Keith N. Morgan, coauthor of *Community by Design: The Olmsted Office and the Development of Brookline, Massachusetts*

**Arthur A. Shurcliff:  
Design, Preservation, and  
the Creation of the Colonial  
Williamsburg Landscape**

Elizabeth Hope Cushing

*Designing the American Park*

University of Massachusetts Press in association with

LALH

Cloth \$39.95

ISBN: 978-1-62534-039-9

To order: University of Massachusetts Press

In 1928, the landscape architect Arthur A. Shurcliff (1870–1957) began what became one of the most important examples of the American Colonial Revival landscape—Colonial Williamsburg, a project that stretched into the 1940s and included town and highway planning as well as residential and institutional gardens. Shurcliff graduated from MIT with a degree in engineering in 1894 but was drawn to landscape architecture. Because no formal programs existed at the time, on the advice of Frederick Law Olmsted and with the aid of his mentor, Charles Eliot, he went on to piece together courses at Harvard College, the Lawrence Scientific School, and the Bussey Institute, earning a second B.S. two years later. He then spent eight years working in the Olmsted office, acquiring a broad and sophisticated knowledge of the profession.

Opening his own practice in 1904, Shurcliff emphasized his expertise in town planning, preparing, through the years, plans for towns surrounding Boston and for several industrial

communities. He designed recreational spaces in and around Boston, including significant aspects of the Franklin Park Zoo and the Charles River Esplanade, one of Shurcliff's major projects in the region.

In Elizabeth Hope Cushing's richly illustrated biography, we see how Shurcliff's early years in Boston, his training, his early design and planning work, and his experience creating an Arts and Crafts-style summer compound in Ipswich led to Colonial Williamsburg, his largest and most significant contribution to American landscape architecture.

"This is a very good piece of work and it will be a singularly important contribution to the literature concerning what I believe is still our least understood period of urban landscape architecture."

—Gary R. Hilderbrand, author of *Making a Landscape of Continuity: The Practice of Innocenti & Webel*

## Community by Design: The Olmsted Firm and the Development of Brookline, Massachusetts

Keith N. Morgan, Elizabeth Hope

*Winner, Ruth Emery Award from the Victorian  
Society in America*

In 1883, Frederick Law Olmsted moved from New York City to Brookline, Massachusetts, a Boston suburb that anointed itself the “richest town in the world.” For the next half century, until his son Frederick Law Olmsted Jr. relocated to California in 1936, the Olmsted firm received more than 150 local commissions, serving as the dominant force in the planned development of this community. From Fairsted, the Olmsteds’ Brookline home and office, the firm collaborated with an impressive galaxy of suburban neighbors who were among the regional and national leaders in the fields of architecture and horticulture, among them Henry Hobson Richardson and Charles Sprague Sargent.

Through plans for boulevards and parkways, residential subdivisions, institutional commissions, and private gardens, the Olmsted firm carefully guided the development of the town, as they designed cities and suburbs across America. Frederick Law Olmsted Sr. and Jr. and their associates represented a new cohort of professionals who worked well in tandem with the wealthy, ensuring both the visual quality and the social hierarchy of the community.

While Olmsted Sr. used landscape archi-

tecture as his vehicle for development, his son and namesake saw Brookline as grounds for experiment in the new profession of city and regional planning, a field that he was helping to define and lead. Little has been published on the importance of Brookline as a laboratory and model for the Olmsted firm’s work. This richly illustrated book provides important new perspective on the history of planning in the United States and illuminates an aspect of the Olmsted office that has not been well understood.

“Chock full of details (with hundreds of reproduced photos and plans) and meticulously researched, the book exposes the multiple webs of influence; wealth, social hierarchy, design genius and high-minded ideals that came together to guide the development of Brookline at a time when booming population and streetcars brought rapid change. The authors trace the relationships among the leading trend-setters in architecture, municipal governance, landscape design, engineering and horticulture as they converge in Brookline at the turn of the 19th century.” —Linda Pehlke, *Brookline Perspective*

## **A Genius for Place: American Landscapes of the Country Place Era**

Robin Karson

Photographs by Carol Betsch

University of Massachusetts Press in association with  
LALH

Cloth \$39.95

ISBN (cloth): 978-1-55849-636-1

Paperback \$29.95

ISBN (paper): 978-1-62534-048-1

***Winner, J. B. Jackson Book Prize from the  
Foundation for Landscape Studies***

In the early twentieth century, new fortunes made it possible for wealthy Americans to commission country estates as a means of aggrandizing social status. These private havens also offered their owners respite from crowded cities and a way to preserve and celebrate places of distinctive landscape beauty. The commissions provided burgeoning numbers of landscape architects with opportunities to experiment with stylistic influences derived from Beaux-Arts, Arts and Crafts, and even Asian principles.

Analyzing these designs in context with one another and against the backdrop of the professional and cultural currents that shaped larger projects, Robin Karson creates a richly comprehensive picture of the artistic achievements of the period. Striking black-and-white photographs by Carol Betsch capture the spirit of these country place landscapes today, and hundreds of drawings, plans, and period photographs illuminate their histories.

“Yet again Robin Karson has hit the ball out of the park. . . . In this book, as in her previous works, Karson redirects us toward our own

homegrown antecedents. And we are that much richer for it.”

—*The American Gardener*

“Karson’s magisterial book shows the magnitude of the Country Place Era landscape heritage and confirms its importance as a major chapter in the history of American landscape design.”

—*Site/Lines*

“The most important book on American gardens for at least a decade, this giant tome spans the first 40 years of the 20th century. . . . Superlative black-and-white photographs by Carol Betsch, taken in the 1990s, already have a classic look about them.”

—*London Telegraph*

“Altogether, text, visuals, and format work to produce a significant and beautiful book. . . . Landscape historians will devour what’s here; others should find inspiration in planting schemes, design details, scale relationships, and photography. This is a feast to be savored and digested slowly, over time.”

—*Landscape Architecture*

**A Modern Arcadia:  
Frederick Law Olmsted Jr. and  
the Plan for Forest Hills Gardens**  
Susan L. Klaus

University of Massachusetts Press in association with  
LALH  
Cloth \$39.95  
ISBN (cloth): 978-1-55849-314-8  
Paperback \$24.95  
ISBN (paper): 978-1-55849-443-5  
To order: [University of Massachusetts Press](#)

***Winner, Center for Historic Preservation  
Book Prize***

***Winner, New York City Book Award for  
Landscape History***

Conceived as an experiment that would apply the new “science” of city planning to a suburban setting, Forest Hills Gardens was created by the Russell Sage Foundation to provide housing for middle-class commuters as an alternative to cramped flats in New York City. Although it has long been recognized as one of the most influential planned communities in the United States, this is the first time Forest Hills Gardens has been the subject of a book.

Susan L. Klaus’s fully illustrated history chronicles the creation of the 142-acre development from its inception in 1909 through its first two decades, offering critical insights into American planning history, landscape architecture, and the social and economic forces that shaped housing in the Progressive Era. Klaus focuses particularly on the creative genius of Frederick Law Olmsted Jr., who served as planner and landscape architect for the project.

Drawing on his father’s visionary ideas but developing his own perspective, the younger Olmsted redefined planning for the modern era and became one of the founders of the profession of city planning in the United States.

“The scholarship in this work is exceptionally thorough. . . . *A Modern Arcadia* will make a significant contribution to the fields of landscape and planning history.”

—Cynthia Zaitzevsky, author of *Frederick Law Olmsted and the Boston Park System*

“*A Modern Arcadia* illuminates the fascinating intersection of social and aesthetic reform movements in the Progressive Era, as well as the early career of a prolific and influential planner and landscape architect.”

—David Glassberg, author of *Sense of History: The Place of the Past in American Life*

**Graceland Cemetery:**  
**A Design History**  
Christopher Vernon

University of Massachusetts Press in association with  
LALH  
Cloth \$39.95  
ISBN: 978-1-55849-926-3  
To order: University of Massachusetts Press

Graceland Cemetery in Chicago was founded in 1860 and developed over several decades by a series of landscape gardeners whose reputations today figure among the most important in the field. An exemplar of the rural cemetery type, Graceland was Chicago's answer to its eastern counterparts, Mount Auburn in Cambridge and Laurel Hill in Philadelphia. Although the initial layout of the cemetery was the work of William Saunders, designer of Laurel Hill, the cemetery is most often associated with a later style of design that featured exclusive use of native plants. Graceland was considered one of the most perfect expressions of this design approach, hailed as the most "modern" cemetery in existence and "the admiration of the world." In this book, Christopher Vernon carefully recovers the history of Graceland and the many hands that helped to shape its influential layout.

Known as the "Cemetery of Architects" because so many notable ones are buried there, Graceland remains a heavily visited attraction. This richly illustrated book helps readers understand how the influential and still beautiful

landscape was developed over many generations, casting new light on the careers of several important landscape architects.

"Vernon's book places this important work of landscape architecture within the context of Chicago's growth as a commercial epicenter, gracefully untangling the threads of Graceland's evolving design which, by the turn of the nineteenth century, had become the impetus for the Midwest's first regional movement in landscape architecture: the Prairie School."

—William H. Tishler, editor of  
*Midwestern Landscape Design*

"Indeed, the research that grounds *Graceland Cemetery: A Design History* is impeccable, as evidenced by the range of contemporary historic and archival sources consulted. Consequently, even the notes make interesting reading (at least for landscape history geeks) with nugget after nugget of supplemental information and intriguing detail."

—*Landscape Journal*

## The Native Landscape Reader

Edited by Robert E. Grese

*A volume in the series  
Critical Perspectives in the History  
of Environmental Design*

University of Massachusetts Press in association with

LALH

Paperback \$29.95

ISBN: 978-1-55849-884-6

To order: University of Massachusetts Press

In this volume Robert E. Grese gathers together writings on nature-based landscape design and conservation by some of the country's most significant practitioners, horticulturists, botanists, and conservationists of the late nineteenth and early twentieth centuries. Written with a strong conservation ethic, these essays often originally appeared in obscure, short-lived publications and are difficult to locate today, comprising a rich but hidden literature.

Over many years of pioneering research into the work of Jens Jensen, O. C. Simonds, and other early landscape architects who advocated for the use of native plants and conservation, Grese encountered and began collecting these pieces. With this volume, he offers readers his trove. Purposely avoiding literature that is widely available, Grese shares as well his expe-

rience of discovery. His introduction provides perspective on the context of these writings and the principles they espouse, and his conclusion illuminates their relevance today with the emerging emphasis on sustainable design. This collection will appeal to general readers interested in the issues of sustainability, horticulture and gardening, and landscape design and preservation, as well as to historians, practitioners, and specialists.

"The relevance of these writings to the current issues of biodiversity, native plants, and sustainability cannot be overemphasized. . . . This extensive collection is a valuable addition to landscape scholarship and practice."

—Robert L. Ryan, coauthor of *With People in Mind: Design and Management of Everyday Nature*

**Mission 66:**  
**Modernism and the**  
**National Park Dilemma**

Award from the Society of Architectural  
Historians*

*A Choice Outstanding Academic Title*

In the years following World War II, Americans visited the national parks in unprecedented numbers, yet Congress held funding at prewar levels and park conditions steadily declined. To address the problem, in 1956 a ten-year billion-dollar initiative titled “Mission 66” was launched, timed to be completed in 1966, the fiftieth anniversary of the National Park Service. The program covered more than one hundred visitor centers (a building type invented by Mission 66 planners), expanded campgrounds, innumerable comfort stations and other public facilities, new and wider roads, parking lots, maintenance buildings, and hundreds of employee residences. To a significant degree, the national park system and the National Park Service as we know them today are products of the Mission 66 era.

Mission 66 was controversial at the time, and it continues to incite debate over the policies it represented. Hastening the advent of the modern environmental movement, it transformed the Sierra Club from a regional mountaineer-

ing club into a national advocacy organization. But Mission 66 was also the last system-wide, planned development campaign to accommodate increased numbers of automotive tourists. Whatever our judgment of Mission 66, we still use the roads, visitor centers, and other facilities the program built. Environmental and park historians, architectural and landscape historians, and all who care about our national parks will enjoy this copiously illustrated history of a critical period in the development of the national park system.

“This is an intelligent and level-headed look at the great promise and the great problems associated with the Park Service’s Mission 66 program. Embedded in it—and in this fascinating book as well—is the age-old dilemma that has plagued our National Parks since their inception, namely, how to make them accessible to everyone while at the same time saving them from those who too often end up ‘loving them to death.’”  
—Ken Burns, filmmaker

# **Fletcher Steele, Landscape Architect: An Account of the Gardenmaker's Life, 1885–1971**

Robin Karson

LALH/University of Massachusetts Press  
Revised Paperback Edition  
Paperback \$34.95  
ISBN: 978-1-55849-413-8  
To order: [University of Massachusetts Press](#)

***Winner, American Society of Landscape Architects Honor Award***

***Named one of the 75 Best Garden Books by the American Horticultural Society***

For sixty years, Fletcher Steele practiced landscape architecture as a fine art, designing nearly seven hundred gardens, from Boston to Detroit, from North Carolina to Canada. Often brilliant, always original, Steele's work is considered by many to constitute the essential link between nineteenth-century Beaux-Arts formalism and modern landscape design.

"A book to give for Christmas, or as the grandest of house presents; it's a book to keep as well. . . . [Karson] has written a wonderful read and, in doing so, has revived an entire era in all its detail. Intelligent, theatrical, infuriating, amusing—and loveable—Steele struts off the page, giving life to his own work." —*Garden Design*

"Karson has done a magnificent job in integrating carefully chosen archival drawings and pictures with contemporary photographs of many gardens. Planting plans and plant lists are offered as additional information for many of the gardens with a comprehensive list of clients. We are given simultaneously a revealing

account of one of America's greatest modern garden designers as well as an inspiring reference of garden-making as a fine art."

—*Public Garden*

"This is a book to be savored, to be read and re-read for enjoyment and consulted repeatedly for inspiration. The text is uncommonly readable, the descriptions of the gardens and their maker consistently perceptive and insightful. . . . [An] exceptional volume." —*Pacific Horticulture*

"Makes available to students and teachers of landscape design a wealth of material: plans, drawings, photographs, and correspondence, as well as interviews with Steele's family, his clients and their family members, office staff and associates, and collaborators in architecture, gardening, art, and sculpture. Moreover, the text places Steele's gardens in the context of major threads of American socioeconomic history and of the development of the young profession of landscape architecture."

—*Landscape Journal*

## Design in the Little Garden

Fletcher Steele

*Reprint of the 1924 edition, with a new introduction by Robin Karson*

LALH/University of Massachusetts Press

Cloth \$20.00

ISBN: 978-1-55849-907-2

To order: University of Massachusetts Press

Among the many books published about garden design, few manage to get at so many vital aspects of the topic so pungently as Fletcher Steele's *Design in the Little Garden*. First published in 1924, and reissued here with a new introduction by Robin Karson, the book captures the sense of possibility that Steele and his landscape architectural colleagues felt as the nation's population swelled and the middle class spilled out of the cities into new suburbs.

One of the foremost landscape designers of the early twentieth century, Steele published frequently in both popular and professional magazines, on topics that ranged from horticulture to conservation, civic improvement, modernism, and space composition. In this slim volume, he tackles the challenges of designing the residential landscape, while also addressing architectural and planning issues and recom-

mending several innovative strategies for suburban house design.

Steele organized his book for clarity and ease of use. Brief chapters focus on both process ("Buying Land") and features ("The Flower Garden," "Rock, Wild, and Wall Gardens," "Grading, Steps, Walks," "Toolhouse, Cold Frames," etc.). In the course of guiding an imaginary couple through the exercise of buying a new home and designing, planting, and maintaining the surrounding yard, he gives life to the guiding principles of cohesion and utility.

Written in an engaging voice, with a sharp wit sometimes tempered by affectionate exasperation, *Design in the Little Garden* provides a concise summary of Steele's design principles and a delightful read for anyone interested in garden design at any scale.

**Silent City on a Hill:  
Picturesque Landscapes  
of Memory and Boston's  
Mount Auburn Cemetery**  
Blanche M. G. Linden

University of Massachusetts Press in association with  
LALH

Paperback \$39.95

ISBN: 978-1-55849-571-5

To order: University of Massachusetts Press

***Original edition, winner, Historic Preservation  
Book Award and American Society of  
Landscape Architects Merit Award***

Originally published in 1989, Blanche Linden's *Silent City on a Hill* offers an insightful inquiry into the intellectual and cultural origins of Mount Auburn Cemetery, the first landscape in the United States to be designed in the Picturesque style. Inspired by developments in England and France and founded in 1831, Mount Auburn became the prototype for the "rural cemetery" movement and was an important precursor of many of America's public parks, beginning with New York City's Central Park. This new edition has been completely redesigned in a larger format, with new photographs and a new epilogue that carries the story forward into the twentieth century.

PRAISE FOR THE ORIGINAL EDITION:

"In illuminating the furthest reaches of Mount Auburn's meaning, the author also sheds light on

many other aspects of nineteenth-century American culture. . . . Each of the eleven chapters—especially the seven or eight that separate out for consideration specific strands of intellectual and aesthetic influence, such as that of the English garden, the French 'cult of ancestors,' or the American sensibility to melancholy—could stand on its own as an interesting study."

—*New England Quarterly*

"No one in the future will be able to write about nineteenth-century cemeteries in the United States without first studying this book. . . . *Silent City on a Hill* is a lavishly satisfying scholarly book."

—*Journal of the Society of Architectural Historians*

## Henry Shaw's Victorian Landscapes: The Missouri Botanical Garden and Tower Grove Park

Carol Grove

University of Massachusetts Press in association with LALH

Cloth \$39.95

ISBN: 978-1-55849-508-1

To order: [University of Massachusetts Press](#)

*Winner, Independent Publisher Bronze Medal*

*A Choice Outstanding Academic Title*

At the age of eighteen, Henry Shaw (1800–1889) left his home in Sheffield, England, to import manufactured goods from St. Louis on the Mississippi and Missouri Rivers. Two decades of financial success allowed him to retire and take up more genteel pursuits. In 1840, he began nearly ten years of travel, which exposed him to museums and botanical gardens in Europe, Asia Minor, and Russia. He vowed to create a similar cultural enterprise in St. Louis.

Shaw's Garden (now the Missouri Botanical Garden) opened in 1859 to legions of enthusiastic visitors. Over the next thirty years, Shaw expanded the plantings, drawing on species introduced by the era's great plant hunters. In 1867, he began work on Tower Grove Park on 276 acres adjacent to the garden, designing in a gardenesque method that emphasized plants as specimens, in keeping with his educational mission.

Carol Grove chronicles Shaw's remarkable story, from his early love of plants to his rising social conscience and his determined quest to create a place of unsurpassed beauty and distinction that would educate and thereby improve Americans. Beautifully illustrated with contemporary and historical photographs, this volume offers an insightful cultural history of Shaw's landscapes, among the most important examples of the gardenesque in America.

"This study by Carol Grove significantly advances our understanding of the background of Tower Grove Park and the Missouri Botanical Garden. Her research has marshaled known sources and also made some new connections that help to illuminate this period in the history of American landscape design through the prism of one visionary philanthropist's experiences."

—John Karel, Director, Tower Grove Park

## **A World of Her Own Making: Katharine Smith Reynolds and the Landscape of Reynolda**

Catherine Howett

University of Massachusetts Press in association with  
LALH  
Cloth \$39.95  
ISBN: 978-1-55849-520-3  
To order: [University of Massachusetts Press](#)

Only a few years after marrying tobacco magnate R. J. Reynolds, young Katharine Smith Reynolds (1880–1924) began to plan a new home for her family. Not many young women of the day found themselves with almost unlimited wealth to construct their dream home, but Katharine's sense of purpose for her vast resources was even more unusual. She envisioned the founding of a model community that would emphasize health, modern technology, mixed-crop scientific farming, education, and rural beauty.

In 1904, when Katharine embarked on her estate project in Winston (now Winston-Salem), North Carolina, the South was still feeling the effects of the Civil War and a century of single-crop farming. After conducting exhaustive research, which included wide-ranging reading in agricultural journals and trips to other American estates and model farms, she began to lay out her property, Reynolda. Her plan was inspired, in part, by the rural landscapes of England that had captured the imagination of Frederick Law Olmsted.

Beginning in 1915, Katharine was aided by

Thomas W. Sears, a highly regarded Philadelphia-based landscape architect. The estate eventually expanded to cover more than 1,000 acres. The process of planning Reynolda paralleled similar efforts in other parts of the United States, as new towns, parks, campuses, and country estates were laid out during the century's first decades.

Catherine Howett's study analyzes the singular convergence of influences that occurred in the imagination of a highly unusual woman. The book provides welcome insight into the culture of the New South and into a richly inventive period in the history of American landscape architecture.

"Brilliantly written—uplifting and riveting—this book brings out of obscurity a 'new woman' of the South, who dedicated her brief life to the creation of a place called Reynolda. . . . Readers, especially women, will find inspiration in its pages."

—Barbara B. Millhouse, author of *American Originals* and president, Reynolda House Museum of American Art

## Midwestern Landscape Architecture

Edited by William H. Tishler

University of Illinois Press in cooperation with LALH

Cloth \$37.50

ISBN: (cloth) 978-0-252-02593-8

Paperback \$19.95

ISBN: (paper) 978-0-252-07214-7

To order: University of Illinois Press

At the turn of the twentieth century, many landscape architects developed approaches to design that celebrated the native midwestern landscape. In this illustrated volume, thirteen historians have contributed essays that illuminate their biographies and the important design and conservation contributions made by these innovators.

Parks, cemeteries, estates, and recreation areas throughout the region were created by individuals intrigued by the prairies, lakes, and native plants of the Midwest: Adolph Strauch introduced the revolutionary “lawn plan” at Cincinnati’s Spring Grove Cemetery; William Le Baron Jenney created the West Parks in Chicago as an armature of order and respite from the burgeoning industrial city; George Kessler’s image of the City Beautiful combined European and American influences in Dallas, Houston, Kansas City, St. Louis, Denver, Cincinnati, Indianapolis, and elsewhere. Other major design practitioners in this collection include Frederick

Law Olmsted, Olmsted Brothers, O. C. Simonds, H. W. S. Cleveland, Warren H. Manning, Elbert Peets, and Annette Hoyt Flanders. *Midwestern Landscape Architecture* also details the contributions of those who championed conservation and ecological awareness in an effort to promote scenic resources, such as Jens Jensen, Wilhelm Miller, and Genevieve Gillette.

“Tishler has done a tremendous service to his profession and to the general public by assembling many of the best landscape historians in North America as contributors to *Midwestern Landscape Architecture*. They make history come to life.”

—Robert Scarfo, Washington State University

“For those interested in the history of the profession this is a ‘must have.’”

—William J. Grundmann, Council of Educators in Landscape Architecture

## **Walks and Talks of an American Farmer in England**

Frederick Law Olmsted

*Reprint of the 1852 edition, with a new  
introduction by Charles C. McLaughlin*

LALH/University of Massachusetts Press  
Paperback \$27.95  
ISBN (paper): 978-1-55849-380-3  
To order: University of Massachusetts Press

Before he ever dreamed of becoming a landscape architect, Frederick Law Olmsted (1822–1903) visited southern England and Wales during a month-long walking tour. A gifted writer, he recorded his impressions of the trip in this richly detailed volume, which has long been out of print.

The new introduction clarifies the links between Olmsted’s developing Picturesque aesthetic, social conscience, and reformer’s passion for change. Charles C. McLaughlin persuasively argues that Olmsted came to adapt many of the features of the cultivated English countryside—first seen on this trip—in designed landscapes such as New York’s Central Park.

This edition provides extensive annotations to the original text, furnishing background and context to the people and places Olmsted encountered during his journey. McLaughlin’s notes are based on his own trips through England, undertaken over two decades to retrace the author’s original route.

“In this book we get not only a young American’s vivid impressions of mid-nineteenth-century England, but also the first glimmers of Frederick Law Olmsted the observant journalist and future landscape designer. Charles McLaughlin’s erudite introduction usefully puts all this in the proper perspective.”

—Witold Rybczynski, author of *A Clearing in the Distance: Frederick Law Olmsted and America in the Nineteenth Century*

“It is fascinating to see Olmsted here absorbing and recording firsthand impressions of England’s rapidly changing countryside and growing industrial cities. McLaughlin’s gracefully erudite introduction to this timely republication provides a vivid portrait of a young mid-nineteenth-century traveler.”

—Elizabeth Barlow Rogers, Foundation  
for Landscape Studies

***Winner, American Society of Landscape  
Architects Honor Award***

Gwinn, one of the best-preserved estates of the Country Place Era, was originally the home of Cleveland industrialist William Mather. It has survived as an important American work of art that today tells a story about early twentieth-century landscape style, economics, and social history.

Three innovative landscape architects collaborated on the project for more than two decades: Charles A. Platt, the architect who adapted the Italian villa to an American setting; Warren H. Manning, the well-known landscape architect, planner, and designer of parks in several states; and Ellen Biddle Shipman, who brought a new American sensibility to the art of garden design.

From a previously unpublished archive of documents and images, Robin Karson presents

a richly detailed and dramatically illustrated account of the lakeside estate's development. By illuminating the battle between formal and informal design principles in creating Gwinn, Karson reveals the larger picture of emerging style in American landscape design.

"Readers who love landscape and garden history will feel themselves transported, as if by a tale of great adventure."

—*Journal of the New England Garden History Society*

"Karson's examination is thorough and scholarly . . . [including] penetrating and illuminating essays. . . . This is a rich period . . . and Karson provides welcome new insight."

—*Journal of the Society of Architectural Historians*

# ASLA CENTENNIAL REPRINT SERIES

## Landscape for Living

Garret Eckbo

*Reprint of the 1950 edition, with a new introduction by David C. Streatfield*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with

LALH

Cloth \$39.95

ISBN: 978-1-55849-696-5

To order: University of Massachusetts Press

Garrett Eckbo (1910–1996) was one of the most highly respected and influential American modernist landscape architects. He worked assiduously to overthrow the Beaux-Arts system of landscape design and to develop an approach that would address the social and economic challenges of the modern world. Eckbo rejected the centrality of nature as a psychological and spiritual source of inspiration, criticizing the “palliative” introduction of nature into cities in parks designed by Olmsted and other nineteenth-century landscape architects and arguing instead for a scientific method that would provide a model for a new approach to landscape design entirely free of preconceptions. Deliberately experimental, Eckbo’s designs were centered on the garden, which he believed was the prototype for all landscape design. His built work was influenced by modernist European architecture, modern art, and vernacular landscape traditions.

Published in 1950, *Landscape for Living* presents a synthesis of Eckbo’s thinking and professional work and sets forth his theoretical approach to achieving the “total landscape.” Illustrations throughout the book feature his own designs for gardens, parks, and institu-

tional projects, group housing from his graduate years, work for the Farm Security Administration, and projects by the firm of Eckbo, Royston & Williams.

David C. Streatfield’s introduction chronicles Eckbo’s life to 1950, from his lonely childhood through his rebellious years at Harvard and well into his distinguished early career as a landscape designer, prolific author, and committed social activist, interpreting Eckbo’s densely written text as a reflection of this history.

“David Streatfield has contributed both new knowledge and insightful analysis to our appreciation of the 1950 modernist manifesto through which Garrett Eckbo sought to persuade American landscape architects, their clients, and the broader public that a new era—radically transformed by science, technology, and the promise of social change—demanded more than formulaic historic styles and soothing scenery in its designed landscapes. The revolutionary temper and optimism of this classic work seem more than ever timely and inspiring.”

—Catherine Howett, Professor Emerita,  
University of Georgia

## New Towns for Old

John Nolen

*Reprint of the 1927 edition, with a new introduction by Charles D. Warren*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with  
LALH

Cloth \$34.95

ISBN: 978-1-55849-480-0

To order: University of Massachusetts Press

John Nolen (1869–1937) was a pioneer in the development of professional town and city planning in the United States. Nolen’s comprehensive approach merged the social, economic, and physical aspects of planning while emphasizing, in the author’s words, “versatility, special knowledge, and cooperation.” Between 1905 and 1937, Nolen’s firm, based in Cambridge, Massachusetts, completed more than 350 commissions throughout the United States. Among the best known of these is Mariemont, Ohio, whose development Nolen directed from the ground up.

Rare and long out of print, *New Towns for Old* (1927) is still of great interest to planners and urban historians. The well-illustrated study contains an overview of the development of American urbanism and a concise discussion of Nolen’s ideas for the improvement of towns and cities. Individual chapters examine a variety of towns planned by Nolen including Mariemont, Ohio; Kingsport, Tennessee; and Kistler, Pennsylvania, as well as the new suburbs of Union Park Gardens in Wilmington, Delaware, and Myers Park in Charlotte, North Carolina. The replanned towns of Cohasset and Walpole, Massachusetts, are also featured. The forward-looking final chapter includes material on Venice, Florida, one of Nolen’s most ambitious projects.

The new edition of *New Towns for Old* contains additional plans and illustrations, a new index, and a new introductory essay by Charles D. Warren, which presents biographical and historical context that illuminates the diverse, productive career of this nationally significant practitioner. Perhaps most significantly, it features Nolen’s project list, which has never before been published.

“Early in the last century, John Nolen planned model towns, garden suburbs, and industrial cities, whose refinement and design excellence remain impressive to this day. In *New Towns for Old*, Nolen explained how it was done. Thoughtful, wise, and still inspirational.”

—Witold Rybczynski, author of *A Clearing in the Distance: Frederick Law Olmsted and America in the Nineteenth Century*

“Warren, a New York City–based architect, provides incredible insights into the evolution of Nolen’s career. . . . We would all benefit from reading this book, especially to brush up on the planning techniques and to realize Nolen’s achievements in civic improvement.”

—*New Urban Review*

## Landscape-Gardening

O. C. Simonds

*Reprint of the 1920 edition, with a new introduction by Robert E. Grese*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with  
LALH

Cloth \$29.95

ISBN: 978-1-55849-258-5

To order: University of Massachusetts Press

Ossian Cole Simonds (1855–1931) was one of the country’s earliest and most important landscape architects, the progenitor of the “middle-western movement” of landscape design. First published in 1920, *Landscape-Gardening* presents Simonds’s carefully conceived and still timely ideas about an approach to landscape design in which nature is both partner and model.

Many of Simonds’s ideas were remarkably prescient. He encouraged the use of native plants; he called for the protection of land for aesthetic as well as utilitarian reasons; he championed interconnected park and boulevard systems or “greenways”; he encouraged the planting of “nature gardens”; and he proposed thoughtful solutions to the increasingly ragged edges of early twentieth-century cities, warning of sprawl long before the word was invented.

Simonds wrote his book in response to what

he saw as alarming changes in the American landscape. Through it, he hoped to teach both professional and general audiences how to read the natural landscape, and to respect and protect its beauty while creating ever more harmonious places in which to live.

This reprint edition includes a new introduction by Robert E. Grese, which places Simonds’s gracefully written text in historical perspective, elucidating many of the broad themes of the profession’s early years.

“With the increasing interest in ecological restoration, sustainable design, and the use of native plants for landscape and gardens alike, it is particularly timely to have a new edition of this seminal volume by O. C. Simonds.”

—Robert Cook, Arnold Arboretum

## Country Life: A Handbook of Agriculture, Horticulture, and Landscape Gardening

Robert Morris Copeland

*Reprint of the 1859 edition, with a new introduction by William H. Tishler*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with

LALH

Cloth \$49.95

ISBN: 978-1-55849-694-1

To order: University of Massachusetts Press

Robert Morris Copeland (1830–1874) was one of a small number of American landscape practitioners whose written and built work helped establish the foundations for city planning and integrated park systems. As did his colleagues Frederick Law Olmsted and Horace Cleveland, Copeland merged many of the principles of scientific farming with landscape gardening. Although he died at a relatively young age, his accomplishments were substantial. He left behind several important designs for cemeteries, estates, suburbs, communities, and parks throughout New England, New York, and Pennsylvania.

In 1859, Copeland published *Country Life*, which quickly became a bible of scientific farming and landscape gardening, as it incorporated the latest agricultural practices with new engi-

neering methods. Handsomely illustrated with plates and woodcuts, the book sold through six editions. Copeland organized the book into an agricultural year that provided practical and aesthetic advice on a month-by-month basis, according to area. He dedicated the book “to all lovers of nature and to all engaged in cultivating and adorning the earth,” suggesting that a well-managed farm “can expand the mind and ennoble the soul.”

A new introduction by William H. Tishler analyzes the importance of the book to mid-nineteenth-century America and chronicles Copeland’s other important achievements, including his early concept for a metropolitan park system for Boston that foreshadowed Charles Eliot’s efforts by many years.

## The Prairie Spirit in Landscape Gardening

Wilhelm Miller

*Reprint of the 1915 edition, with a new  
introduction by Christopher Vernon*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with  
LALH

Cloth \$34.95

ISBN: 978-1-55849-329-2

To order: University of Massachusetts Press

In 1915, Wilhelm Miller (1869–1938), an influential author and editor, published *The Prairie Spirit in Landscape Gardening*, a profusely illustrated book that championed the “prairie style” of landscape gardening. It was the first book to address the question of a truly American style of landscape design and remains one of the most significant early treatises on that topic.

This handsome volume features several projects by Jens Jensen, a Danish immigrant whose ecologically based, conservation-oriented approach to park and residential design had a strong impact in Chicago and formed the foundation of the stylistic school Miller was promoting. The book also features photographs of O. C. Simonds’s designs for Chicago’s Graceland Cemetery and midwestern landscapes by Walter Burley Griffin, Frank Lloyd Wright, and Warren H. Manning, among others. Before-and-after images vividly demonstrate Miller’s taste for abundant use of hardy native plants in landscape design. His emphatic captions—“Away with Gaudy For-

eigners and Artificial Varieties!” “Restore the Native Vegetation!”—leave little doubt about his aesthetic position.

Christopher Vernon’s new introduction links the prairie style to Wright and other architects of the Progressive Era, arguing that Wright’s use of prairie landscape elements actually preceded that by Jensen, Simonds, and their peers. Vernon shows how prairie imagery provided design ideas for some and also provided a label—prairie style—that helped promote naturalistic work generally. Architects, landscape architects, and garden enthusiasts will be intrigued by Vernon’s insights and inspired by Miller’s impassioned call to celebrate, replicate, and conserve the midwestern landscape.

“Miller’s book provides a still-practical handbook for Midwestern gardens that lends a strong historical basis for linking such work today with its precedent.”

—*Journal of the New England Garden History Society*

## The Art of Landscape Architecture

Samuel Parsons Jr.

*Reprint of the 1915 edition, with a new introduction by Francis R. Kowsky*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with  
LALH

Cloth \$39.95

ISBN: 978-1-55849-695-8

To order: University of Massachusetts Press

Samuel Parsons Jr. (1844–1923) was one of the most well known names in the field of landscape design in the early twentieth century. A protégé of Calvert Vaux, Parsons worked with the architect until Vaux's death in 1895. As superintendent of planting in Central Park and landscape architect to the City of New York for nearly thirty years, Parsons was, until his resignation in 1911, the last direct link in the city to the ideals of Vaux and Frederick Law Olmsted.

The most widely read of Parsons's several books, *The Art of Landscape Architecture* (1915)

was an affectionate summing up of the theories and built work that had inspired America's first generation of landscape architects. Parsons illustrated his book with photographs depicting a wide range of landscapes, including several of the park designed by the German landscape gardener Prince Hermann von Pückler-Muskau.

A new introduction by Francis R. Kowsky explores Parsons's contributions to the nascent profession of landscape architecture, his championing of the work of Pückler-Muskau, his defense of Olmsted and Vaux's vision for Central Park, and his own successful landscape designs.

# **Landscape Architecture, as Applied to the Wants of the West; with an Essay on Forest Planting on the Great Plains**

H. W. S. Cleveland

*Reprint of the 1873 edition, with a new  
introduction by Daniel J. Nadenicek and  
Lance M. Neckar*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with  
LALH  
Cloth \$29.95  
ISBN: 978-1-55849-330-8  
To order: University of Massachusetts Press

An important force in nineteenth-century American landscape architecture, H. W. S. Cleveland (1814–1900) has long been overshadowed by Frederick Law Olmsted, with whom he worked briefly at Prospect Park. Cleveland’s “organic” design approach was first expressed in 1855 at Sleepy Hollow Cemetery in Concord, Massachusetts, where he and Robert Morris Copeland developed a landscape aesthetic based chiefly on the writings of Ralph Waldo Emerson. *Landscape Architecture, as Applied to the Wants of the West*, published in 1873, summarizes Cleveland’s organic approach and its application at all scales of design and planning. The book is especially significant as the first attempt to define and develop a com-

prehensive scope for the new profession of landscape architecture in its formative period.

A new introduction to the text provides a historical backdrop to Cleveland’s concern that ill-considered layouts for communities along the rapidly developing rail lines of the Midwest and Great Plains would negatively affect what he saw as the future of American civilization.

“The reprint and its perceptive introduction should help landscape historians give Cleveland the recognition he rightly deserves as one of America’s foremost pioneering landscape architects.”

—*Journal of the New England Garden History Society*

## The Spirit of the Garden

Martha Brookes Hutcheson

*Reprint of the 1923 edition, with a new introduction by Rebecca Warren Davidson*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with  
LALH

Cloth \$34.95

ISBN: 978-1-55849-272-1

To order: University of Massachusetts Press

Martha Brookes Hutcheson (1871–1959) was one of the first American women landscape architects to receive professional training. Like many of her female colleagues, she specialized in garden design, the topic of her acclaimed book, *The Spirit of the Garden*. When first published in 1923, the volume was both a critical and a commercial success, widely praised for its articulation of the architectural principles of garden design. “Every garden lover,” advised one contemporary reviewer, “should have it on a most convenient table.”

In an insightful new introduction, Rebecca Warren Davidson explores Hutcheson’s motives for becoming a landscape architect. In Davidson’s view, Hutcheson considered fine landscape design an instrument of social change and was inspired to write her book by a Progressive Era

zeal. Davidson examines the circumstances of Hutcheson’s entry into MIT in 1900 and her subsequent career until her marriage at age forty, when she retired from active practice and turned to writing and lecturing.

Among the many beautiful photographs illustrating Hutcheson’s designs are examples from Maudslay State Park in Newburyport, Massachusetts; the Longfellow National Historic Site in Cambridge; and Bamboo Brook Conservation Center in Gladstone, New Jersey—all of which are now open to the public.

“A book remarkable for its concise and practical suggestions and which is at the same time brilliant and entertainingly written.”

—*Architectural Record*, 1923

## Charles Eliot, Landscape Architect

Charles W. Eliot

*Reprint of the 1902 edition, with a new introduction by Keith N. Morgan*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with  
LALH

Cloth \$50.00

ISBN: 978-1-55849-212-7

To order: University of Massachusetts Press

One of the most important figures in American landscape history was Charles Eliot, whose story is told in this richly detailed biography. It was written by his father, the president of Harvard College, in 1902, a few years after Eliot's death at age thirty-eight from spinal meningitis.

Like his colleague and partner Frederick Law Olmsted, the younger Eliot was a figure of enormous talent and energy. He emerges from his father's text as a brilliant though melancholy young man with a passion for travel, history, and the natural landscape. Included are passages from Eliot's travel writing, professional correspondence, and public reports, which bear witness to the range of his interests and intellect.

In a new introduction, Keith N. Morgan

offers a critical reading of Eliot's life and contributions to the fields of landscape architecture and regional planning. Filling in the gaps left by Eliot's father, he offers new insights into an important chapter in American landscape history.

This edition includes 110 illustrations and two large fold-out maps that show the distribution of public open spaces in metropolitan Boston in 1892 and 1901.

"The book is a classic, the expression of enduring landscape values despite nearly a century of evolutionary changes in the profession. . . . [Morgan's is] a fine essay, scrupulously fair and illuminating."

—*Journal of the New England Garden History Society*

## Book of Landscape Gardening

Frank A. Waugh

*Reprint of the 1926 edition, with a new introduction by Linda Flint McClelland*

*ASLA Centennial Reprint Series*

University of Massachusetts Press in association with  
LALH

Cloth \$34.95

ISBN: 978-1-55849-521-0

To order: University of Massachusetts Press

In 1903, Frank Albert Waugh (1869–1943) founded an undergraduate program in “landscape gardening” at Massachusetts Agricultural College, only the second such program in the nation. The profession he helped to pioneer is now known as landscape architecture, and the college has become the University of Massachusetts Amherst. Waugh, who had moved to New England in 1895 from his native Midwest, was one of the first practitioners to conceive of a history of American landscape architecture. He was a renowned teacher and horticulturalist as well as a prolific writer on topics ranging from design to pomology, a talented printmaker, photographer, and flutist. Although his writings were rooted in the principles of naturalistic nineteenth-century landscape gardening, his theories promoted modern applications.

The most comprehensive of Waugh’s several published books, and widely considered a classic in the field, *Book of Landscape Gardening* was first published in 1899 and revised several times.

“Landscape gardening is eminently a fine art,” Waugh began each edition of the popular text that became a standard in professional practice. In the chapters that follow, he covers several general principles of design and discusses three basic styles—the natural, the architectural, and the picturesque.

The book achieved its broad appeal by striking a balance between well-known period examples and solutions that could be achieved by the professional designer, highway engineer, estate gardener, or average homeowner. Photographs, many of them taken by Waugh, depict far-ranging landscapes from Europe and Japan to diverse regions of the United States. Several plant lists and an annotated bibliography of landscape design sources accompany the text.

In this edition, a new introduction by Linda Flint McClelland examines Waugh’s contributions to landscape architecture during a period of great technological change, growing cultural sophistication, and economic prosperity.

# AUTHOR BIOGRAPHIES

SARAH ALLABACK, senior manuscript editor at LALH, is author of *The First American Women Architects* and coeditor of the LALH Masters of Modern Landscape Design series.

JANE ROY BROWN, former director of educational outreach at LALH, is coauthor of *One Writer's Garden: Eudora Welty's Home Place*.

DEAN CARDASIS, FASLA, retired professor of landscape architecture at Rutgers, the State University of New Jersey, is director of the James Rose Center for Landscape Architectural Research and Design in Ridgewood, New Jersey.

ETHAN CARR, FASLA, is professor of landscape architecture at the University of Massachusetts Amherst and an international authority on America's public landscapes. He is author of *Wilderness by Design: Landscape Architecture and the National Park Service* and *Mission 66: Modernism and the National Park Dilemma*, lead editor of *Public Nature: Scenery, History, and Park Design*, editor of volume 8 of the *Papers of Frederick Law Olmsted*, and series editor of *Designing the American Park* (LALH).

KELLY COMRAS, FASLA, is principal landscape architect in the firm KCLA in Pacific Palisades, California.

ELIZABETH HOPE CUSHING is a landscape historian. In addition to writing cultural landscape history reports for the Taft Art Museum, Cincinnati, the National Park Service, the Department of Conservation and Recreation of the Commonwealth of Massachusetts, and other institutions and agencies, she has contributed essays to *Pioneers of American Landscape Design*; *Design with Culture: Claiming America's Landscape Heritage*; *Shaping the American Landscape*; and *Drawing Toward Home*. Cushing is currently working on a biography of Frederick Law Olmsted Jr.

REBECCA WARREN DAVIDSON is an architectural and landscape historian. Formerly a cura-

tor of graphic arts in Rare Books and Special Collections at Princeton University, Davidson is a lecturer in art history at Ithaca College.

ROBERT E. GRESE is professor of landscape architecture at the University of Michigan, where he serves as director of the Matthei Botanical Gardens and Nichols Arboretum, and author of *Jens Jensen: Maker of Natural Parks and Gardens*. Grese is particularly interested in the restoration and management of urban wilds and the role such lands can play in connecting children and families with nature. He was featured as the **LALH Preservation Hero** in the 2010 issue of *VIEW*.

CAROL GROVE, adjunct assistant professor of art history and archaeology at the University of Missouri–Columbia, is author of *Henry Shaw's Victorian Landscapes: The Missouri Botanical Garden and Tower Grove Park* (LALH, 2005).

KENNETH I. HELPHAND, FASLA, is professor emeritus of landscape architecture at the University of Oregon, where he has taught courses in landscape history, theory, and design since 1974. He is the author of four previous books and numerous articles. An Honorary Member of the Israel Association of Landscape Architects, Helphand is a former editor of *Landscape Journal* and chair of the Senior Fellows at Dumbarton Oaks.

CATHERINE HOWETT, FASLA, is professor emerita in the College of Environment and Design at the University of Georgia. She has also edited, written, or contributed to several previous books, including *The Gardening Book of James L. Hunter: A Southern Planter*; *Land of Our Own: 250 Years of Landscape and Gardening Tradition in Georgia, 1733–1983*; *Residential Work of the Olmsted Firm in Georgia, 1893–1937*; and *Abstracting the Landscape: The Artistry of Landscape Architect A. E. Bye*.

ROBIN KARSON, Hon. ASLA, is a landscape historian and the founder and executive director of LALH. She has published extensively on

American landscape architectural history and design, including several books and numerous articles and essays, and is coeditor of *Pioneers of American Landscape Design*. Her books have received two Honor Awards from the ASLA, an American Horticultural Society Book Award, and a J. B. Jackson Award.

SUSAN L. KLAUS is an independent scholar with particular interest in urban and landscape history. She has published numerous articles on Olmsted Jr. and the work of the Olmsted firm.

FRANCIS R. KOWSKY is State University of New York Distinguished Professor of Fine Arts emeritus at Buffalo State College, SUNY, Buffalo, and author of *Country, Park, and City: The Architecture and Life of Calvert Vaux*.

BLANCHE M. G. LINDEN (1946–2014) was an independent scholar with special interest in landscape, architectural, and urban history. Her numerous publications in women's studies, visual and material culture, and American history include *Spring Grove: Celebrating 150 Years*.

LINDA FLINT McCLELLAND is a historian for the National Park Service and author of *Building the National Parks: Historic Landscape Design and Construction*.

CHARLES C. McLAUGHLIN (1929–2005) was professor of history at American University and founding editor of *The Papers of Frederick Law Olmsted*.

JC MILLER is a partner at Vallier Design Associates in Point Richmond, California, and the director of the Landscape Architecture Certificate Program at UC Berkeley Extension. He worked for over a decade in the Royston office and, as a principal, assisted Royston in the design and execution of his final projects.

CYDNEY MILLSTEIN, founder and principal of Architectural & Historical Research in Kansas

City, is coauthor, with Carol Grove, of *Houses of Missouri, 1870–1940*.

KEITH N. MORGAN, retired professor of art history and director of architectural studies at Boston University, is author of *Shaping a New American Landscape: The Art and Architecture of Charles A. Platt* and coauthor of *Boston Architecture, 1975–1990*. He is also editor and principal author of *Buildings of Massachusetts: Metropolitan Boston* and architecture editor for *The Encyclopedia of New England*.

DANIEL J. NADENICEK is dean of the College of Environment and Design and holds the Constance Knowles Draper Chair in Environmental Design at the University of Georgia. His other publications include more than ninety articles, reviews, reports, and proceedings in the areas of historic preservation, landscape history, and urban design. Nadenicek serves as coeditor of *Landscape Journal* and is currently working on a forthcoming LALH book about the conservation work of Frederick Billings, financier and president of the Northern Pacific Railway.

LANCE M. NECKAR, professor of landscape architecture at the College of Architecture and Landscape Architecture, University of Minnesota, Twin Cities, has received numerous awards for excellence in teaching.

WILLIAM E. O'BRIEN is associate professor of environmental studies at the Harriet L. Wilkes Honors College of Florida Atlantic University. His work on environment and race has appeared in journals including *Historical Geography*; *Geographical Review*; *Human Ecology*; *Journal of Geography*; and *Ethics, Place and Environment*. He is a 2014 recipient of the University Award for Excellence and Innovation in Undergraduate Teaching.

REUBEN RAINEY, FASLA, professor emeritus at the University of Virginia, taught landscape architecture history and theory for over thirty years. A former professor of religious studies,

Rainey has written on a wide variety of topics, from Italian Renaissance landscapes to modern “healing gardens.”

ROGER G. REED is a historian for the National Register of Historic Places and the National Landmarks Program. His previous publications include *Building Victorian Boston: The Architecture of Gridley J. F. Bryant*.

DAVID SCHUYLER is professor of American studies at Franklin and Marshall College. He is author of *Sanctified Landscape: Writers, Artists, and the Hudson River Valley, 1820–1909*; *The New Urban Landscape: The Redefinition of City Form in Nineteenth-Century America*; and *A City Transformed: Redevelopment, Race, and Suburbanization in Lancaster, Pennsylvania, 1940–1980*. He has served as coeditor of several volumes of the *The Papers of Frederick Law Olmsted*.

R. BRUCE STEPHENSON is director of the Planning in Civic Urbanism masters program at Rollins College, a landscape design consultant, author of *Visions of Eden: Environmentalism and Urban Planning in St. Petersburg, Florida, 1900–1995*, and contributing scholar to the Florida Humanities film series on community, *Imagining a New Florida*.

DAVID C. STREATFIELD is professor emeritus of landscape architecture at the University of Washington. His previous publications include numerous essays and *California Gardens: Creating a New Eden*.

JUDITH B. TANKARD is a landscape historian, preservation consultant, and author or coauthor of seven other books on landscape history, including *Gertrude Jekyll and the Country House Garden*. She taught at the Landscape Institute, Arnold Arboretum of Harvard University, for more than twenty years.

WILLIAM H. TISHLER, FASLA, is professor emeritus of landscape architecture at the University of Wisconsin–Madison, and editor of *American Landscape Architecture: Designers and Places*.

CHRISTOPHER VERNON is associate professor in the School of Architecture, Landscape, and Visual Arts at the University of Western Australia. His extensive publications address topics including the landscape architecture of Marion Mahony and Walter Burley Griffin; the designed landscapes of Canberra, Australia; and the Prairie School in American landscape architecture.

CHARLES D. WARREN is an architect and author. His previous publications include *Carrere & Hastings, Architects* (as coauthor) and the introduction to *The Architecture of Charles A. Platt*. Warren has taught design at the University of Michigan and the Institute for Classical Architecture, and in 1990–91 was town architect in Seaside, Florida.

THAISA WAY, ASLA, professor of landscape architecture, teaches history, theory, and design at the University of Washington. She has published and lectured on feminist histories of design and women practitioners. The author of several books, Way is the editor of the forthcoming collection of essays *River Cities, City Rivers* (2018), part of the Dumbarton Oaks Colloquia series.

## Designing the American Park Series

*in association with University of Georgia Press*

From Central Park to Yosemite Valley, park landscapes are among the most significant achievements of American art and society. The historical events and themes that motivated their creation—the reform of the city, the roots of environmentalism, the changing meaning of nature in American art—give park history a broad appeal. While parks are often touted as “America’s best idea,” there has been no series of scholarly publications devoted specifically to the history of their design. Designing the American Park will attract a generation of contributors who are ready to forge a mature vision of this unique chapter in American cultural history.

There is a remarkable continuity in design theory and process across the diversity of types and purposes of American parks. The emphasis of this series specifically on design illuminates these connections, including those among the design of municipal, state, and national parks.

Park design is not only understudied, its essential purpose and character are often misunderstood. Design, after all, implies some kind of development, and therefore a human intervention that is the antithesis of the “natural.” But our “best idea” has only remained so because it has been constantly reinvented through new design. Design is what makes it

possible for the public to enjoy a natural area while limiting the impacts of that use. Design is the difference between a vacant lot and a playground. Volumes in Designing the American Park will not only be scholarly contributions but will help reclaim, inform, and redefine the purposes of park design today.

### **SERIES EDITOR**

Ethan Carr, FASLA, is a landscape historian and preservationist specializing in the public landscapes of the United States. He has written two books on the history of American park planning and design, *Wilderness by Design* (1998) and *Mission 66: Modernism and the National Park Dilemma* (LALH, 2007), and is currently a professor in the Department of Landscape Architecture and Regional Planning at the University of Massachusetts Amherst.

### **MANUSCRIPT INQUIRIES**

Please direct manuscript inquiries to Ethan Carr, Professor, Landscape Architecture and Regional Planning, 210 Design Building, 551 North Pleasant Street, University of Massachusetts, Amherst, MA 01003 (carr@larp.umass.edu) or Robin Karson, Director, Library of American Landscape History, P.O. Box 1323, Amherst, MA 01004 (rkarson@lalh.org).

## Critical Perspectives in the History of Environmental Design Series

*in association with University of Georgia Press*

“The land is the appointed remedy for whatever is false and fantastic in our culture. The continent we inhabit is to be the physic and food of our mind, as well as our body. The land with its tranquilizing, sanative influences, is to repair the errors of a . . . traditional education, and bring us into just relations of men and things.”

—Ralph Waldo Emerson (1844)

Since Emerson’s day, advocates of environmental design have held true to the two primary principles expressed in this quote: that a connection to the physical world (especially the landscape) provides physical, mental, and spiritual benefits and that landscape design offers a means of orchestrating a “just relation” between humans and the world.

Our definition of environmental design includes a motivation to benefit people and place through design or preservation of the landscape. It implies a conjunction of many disciplines—including landscape architecture, architecture, urban planning, forestry, regional planning, engineering, ecology, horticulture, historic preservation, geography, and American literature.

The series is intended to investigate the history of environmental design from a variety of angles. Topics might include a place or places, designer or designers, or historical figures impor-

tant to the history of environmental design; a significant theme or movement revealed and understood by analyzing the design of places; or an assessment of historical literature on the subject. International linkages and the evolution and transference of ideas through time and space are considered important to the American story.

Because of the absolute necessity of sustainable living in the future, the series is particularly timely. Its goal is to foster a cross-disciplinary dialogue about the relationship of humans to nature, influencing the decisions we make and the places we design today.

### **SERIES EDITOR**

Daniel J. Nadenicek is dean of the College of Environment and Design at the University of Georgia. A well-known scholar in the field, Nadenicek has published many articles about the history of landscape architecture and its relationship to American literary ideas.

## Masters of Modern Landscape Design

in association with University of Georgia Press

The Masters of Modern Landscape Design series explores the work of the most significant American landscape architects of the twentieth century. Written for a diverse range of readers, these concise, authoritative monographs discuss each practitioner's career in a biographical overview followed by succinct, illustrated essays on selected projects.

LALH launched the series in 2016 with the publication of *Ruth Shellhorn*, the first book on this influential landscape architect and her role in developing what would become an iconic California design aesthetic. Subsequent monographs on James Rose and Lawrence Halprin continued the exploration of modernist landscape architecture in America.

Our goal for the Masters of Modern Landscape Design series is to educate broad audiences about the field of landscape architecture, to place important practitioners in national and international context, and to provide preservation support for historic gardens, parks, suburbs, and campuses. To this end, LALH has expanded the scope of the series to include the generations

of landscape architects who laid the foundations for midcentury modernism as well as those who continued to engage with modernist-influenced principles into the late twentieth century.

The paperback volumes are affordable, engagingly written, well illustrated, and handsomely designed—suitable for sales in bookstores, museum shops, and botanical gardens. They are intended for students, preservationists, and design practitioners as well as general readers.

### SERIES EDITORS

Robin Karson, Hon. ASLA, is the executive director of LALH and the author of several books on American landscape architects and their work. Sarah Allaback, LALH senior manuscript editor, has published on a variety of topics related to architecture and design.

## American Society of Landscape Architects Centennial Reprint Series in association with University of Massachusetts Press

The series comprises a small library of influential books about American landscape architecture. The ten titles were selected by a committee of distinguished historians and practitioners who identified them as classics, important in shaping design, planting, planning, and stewardship practices in the field and still relevant today. Each is reprinted from the original edition and includes a new introduction that provides historical and contemporary perspective. The project was undertaken by LALH to commemorate the 1999 centennial of the ASLA.

The series was funded by the Viburnum Foundation, Rochester, New York, now the Viburnum Trilobum Fund of the New York Community Trust, advised by Nancy R. Turner.

*Country Life: A Handbook of Agriculture, Horticulture, and Landscape Gardening* by Robert Morris Copeland (1859)

*Landscape Architecture, as Applied to the Wants of the West* by H. W. S. Cleveland (1871)

*Charles Eliot, Landscape Architect* by Charles W. Eliot (1902)

*The Prairie Spirit in Landscape Gardening* by Wilhelm Miller (1915)

*The Art of Landscape Architecture* by Samuel Parsons Jr. (1915)

*Landscape-Gardening* by O. C. Simonds (1920)

*The Spirit of the Garden* by Martha Brookes Hutcheson (1923)

*The Book of Landscape Gardening* by Frank A. Waugh (1926)

*New Towns for Old* by John Nolen (1927)

*Landscape for Living* by Garrett Eckbo (1950)

## Film Series: North America by Design

North America by Design is a series of short documentary films about influential North American landscapes and their designers produced by LALH in association with award-winning Hott Productions of Florentine Films.

Through the magic of the camera's movement, these films explore the physical reality and the spirit of special places and the people who imagined, created, and cared for them.

Grounded in core scholarship distilled from LALH books, the mini-documentaries are hosted by historians and landscape architects who explain the design process in accessible terms that will engage nonspecialists as well as students, practitioners, and scholars.

Our goal is to educate wide audiences about the fine art of landscape architecture. Each film is also a work of art in its own right.

## Fletcher Steele and Naumkeag: A Playground of the Imagination

Between 1926 and 1955, landscape architect Fletcher Steele and his client Mabel Choate created many new gardens for Naumkeag, the Choate family summer estate in Stockbridge, Massachusetts. The new designs respected the layout of earlier gardens created c. 1885 by Nathan Barrett for the original Stanford White “cottage.”

A vibrant relationship developed between Choate and Steele, whose work began with Naumkeag’s Afternoon Garden and soon progressed to other features in the landscape: the

South Lawn, Chinese Temple Garden, Blue Steps, and Rose Garden. Each of these designs reflected the tempo of its time and also connected visitors to the beauty of the Berkshire Mountains, visible from any part of the landscape. It is a magical site, truly a playground of the imagination.

You can read more about Fletcher Steele in these LALH books: *Fletcher Steele, Landscape Architect*; *A Genius for Place*; and *Design in the Little Garden*.

## Designing in the Prairie Spirit: A Conversation with Darrel Morrison

*Designing in the Prairie Spirit* features internationally renowned landscape architect Darrel Morrison, who reflects on his childhood in Iowa and the impact of Jens Jensen, Aldo Leopold, and others on his career.

You can read more about the “prairie spirit” in North American landscape design in *The Native Landscape Reader*; *The Prairie Spirit in Landscape Design*; *Landscape-Gardening*; and *A Genius for Place*.

## The Best Planned City in the World: Olmsted, Vaux, and the Buffalo Park System

*Winner, 2015 Society of Architectural Historians Award for Film and Video*

Based on the LALH book by Francis R. Kowsky, this film explores the development of the nation's first park system, designed by Frederick Law Olmsted and Calvert Vaux in 1868.

You can read more about the Buffalo Parks system in *The Best Planned City in the World: Olmsted, Vaux, and the Buffalo Park System*.

## Community by Design: The Olmsted Firm and the Development of Brookline, Massachusetts

In 1883, Frederick Law Olmsted Sr. moved from New York City to Brookline, Massachusetts, a Boston suburb that had anointed itself the “richest town in the world.” From Fairsted, the Olmsteds’ Brookline home and office, the firm collaborated with an impressive galaxy of neighbors who were among the regional and national leaders in the fields of architecture and horticulture, among them Henry Hobson Richardson and Charles Sprague Sargent. Through

plans for boulevards and parkways, residential subdivisions, institutional commissions, and private gardens, the Olmsted firm carefully guided the development of Brookline, at the same time designing cities and suburbs across North America.

You can read more about the work of the Olmsted firm in *Community by Design; A Modern Arcadia; The Best Planned City in the World*; and *Walks and Talks of an American Farmer in England*.

## Ruth Shellhorn: Midcentury Landscape Design in Southern California

*Winner, Audience Favorite Award, Modesto Architecture Festival*

Over the course of her nearly sixty-year career, modernist landscape architect Ruth Shellhorn (1909–2006) created close to four hundred landscape designs and collaborated with some of the most celebrated architects in Southern California.

Today she is best remembered for her Bull-ock’s department store designs—lush gardens and fountain-filled courtyards that lured shop-

pers with the promise of the “Southern California experience.” Shellhorn also worked to preserve the region’s coastline, and in 1955 she helped lay out Disneyland. A year later, she became supervising landscape architect for the University of California at Riverside. Shellhorn’s landscape legacy is unique and largely unknown. You can read more about this important practitioner in *Ruth Shellhorn*.
